EYCK FREYMANN

Eyck Freymann is the author of multiple acclaimed books, including *The Arsenal of Democracy: Technology, Industry, and Deterrence in an Age of Hard Choices* and *One Belt One Road: Chinese Power Meets the World* (Harvard University Press), hailed as the "definitive" study of China's global strategy. His latest work, *Defending Taiwan: A Strategy to Prevent War with China* published in April of 2026.

Dr. Freymann is a Hoover Fellow at Stanford, where he directs the Allied Coordination Working Group, and a Director at Greenmantle, where he has given over one thousand political risk briefings to dozens of the world's largest asset managers. Trained as a China expert with four degrees from Harvard, Cambridge, and Oxford, his analysis draws on historical episodes and cutting-edge discussion of economics and defense technology.

Dr. Freymann also serves as a Non-Resident Research Fellow at the U.S. Naval War College and advises senior policymakers in the United States and allied countries across the full spectrum of U.S.-China competition—from economic warfare and technology competition to infrastructure diplomacy and military deterrence. His commentary appears regularly in *The Wall Street Journal*, *The New York Times*, *Foreign Affairs*, *The Economist*, and *War on the Rocks*, focusing on national security issues of bipartisan concern.

A compelling and provocative speaker with unmatched range, Dr. Freymann helps audiences understand how competition with China plays out across economics, technology, diplomacy, and security. Drawing on deep expertise in Chinese-language sources and CCP strategic thinking, he translates complex geopolitical dynamics into actionable insights for leaders navigating everything from supply chain security to military contingency planning.

Dr. Freymann also directs Indo-Pacific and technology coverage at Greenmantle, advising Fortune 500 companies and major asset managers. He holds four degrees in history and China Studies from Oxford, Cambridge, and Harvard.
